Bengaluru / Hyderabad (Open to Relocation)

PROFESSIONAL SUMMARY

Customer-centric Software Solutions Engineer with a strong foundation in enterprise software support, technical troubleshooting, and solution development. Highly proficient in coding with Java, Python, SQL, and client-side web technologies (JavaScript, HTML, CSS, React.js). Adept at analyzing logs, debugging complex applications, and collaborating with cross-functional teams to resolve technical issues for internal and external partners. Committed to delivering globally scalable, secure, and efficient business solutions in fast-paced Agile environments.

EXPERIENCE

Associate Support Engineer

Jan. 2024 – Present

Edifecs Technologies Private Limited (A Cotiviti Business)

Chandigarh, India

- Troubleshoot, debug, and resolve complex technical issues within enterprise software applications, ensuring seamless system functionality for internal and external partners.
- Provide technical expertise in analyzing application logs and identifying root causes to significantly reduce resolution times for customers.
- Develop and maintain robust, scalable solutions using Java and SQL scripts, optimizing system performance and data processing.
- Collaborate cross-functionally within Agile environments to adapt to evolving customer priorities and implement continuous software enhancements.
- Optimize database solutions through data modeling and query tuning to enhance overall system efficiency and support data analytics.

TECHNICAL PROJECTS

Terminal Based Portfolio | *Next.js, TypeScript, React.js, Tailwind CSS*

Jan. 2023 – May 2023

- Engineered an interactive, terminal-like web interface utilizing modern client-side web technologies.
- Developed the architecture using the Next.js and React.js ecosystem, implementing advanced styling and animations.

Planetary Pounds | *JavaScript, HTML, CSS*

Sep. 2022

- Built a client-facing utility tool utilizing client-side technologies (JavaScript, HTML, CSS) to calculate dynamic data across the Solar System.

Replica - An iPhone Simulator | *HTML, CSS, JavaScript, jQuery*

May 2021 – Aug. 2021

- Architected an iOS 14 simulator web application heavily relying on core web technologies: HTML, CSS, and JavaScript.
- Replicated real-time functionality of core applications and programmed complex gesture recognition to mirror hardware actions.

EDUCATION

Chitkara University

Chandigarh, India

Bachelor of Engineering in Computer Science (CGPA: 9.75/10)

Oct. 2020 – Aug. 2024

- **Relevant Coursework:** Object-Oriented Programming (Java), Data Structures, Algorithms, Python, Full Stack Development.
- **Advanced Studies:** Completed foundational courses in IoT, Cybersecurity, Artificial Intelligence, and Machine Learning.

TECHNICAL SKILLS

Client-Side Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, HTTP, TypeScript, Next.js

Programming Languages: Java (Core Java, OOP, Collections), Python, Swift, SQL

Database Technologies: SQL (Queries, Joins, Optimization), Oracle Database

Core Competencies: Technical Troubleshooting, Client Solutions, Log Analysis, Root Cause Analysis (RCA), Bug Fixing, Data Analytics

Tools & Methodologies: Git/GitHub, Eclipse/IntelliJ, Agile/Scrum, Linux (Basic Commands, Log Analysis)
